

COOLING TOWER INTEGRITY AND MECHANICAL SERVICES

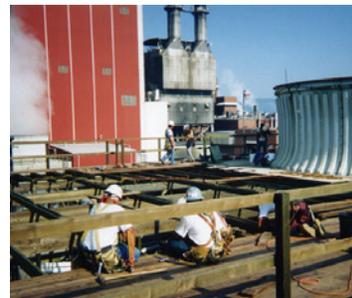

KEY CAPABILITIES

TOSL Engineering Limited offers a wide range of comprehensive cooling tower refurbishment and repair solutions. We are well-positioned to be your next EPC (Engineering, Procurement & Construction) partner for both crossflow and counterflow cooling tower projects.

Capability includes structural repairs, mechanical upgrades, and full-scope project execution. Our turnkey solutions encompass initial inspections, scope development, skilled labour, provision of materials, specialized tooling and equipment, scaffolding erection, logistics, and expert project management. We specialize in structural member rehabilitation, fan assembly overhaul, and FRP component repair or replacement across all cell types and conversion of a lumber staircase to fiber reinforced plastic (FRP).

Reinstallation of Mechanical Components

Preparation of Fan Deck Area

Surface Preparation and Coating of Removed Mechanical Parts

Removal of Mechanical Parts and Repairs To Structural Members

Fiber Reinforced Plastic (FRP) Works
