

RENEWABLE ENERGY

SOLAR POWER

TOSL Engineering Limited boasts extensive expertise and experience in providing comprehensive services for Solar PV and Solar Water Heating Systems. With years of industry presence, we specialize in the full spectrum of solar energy solutions, from designing tailored systems to installation, commissioning, and ongoing maintenance. Our skilled team ensures that each project is handled with precision, delivering high-performance solutions that meet our clients' unique energy needs. Additionally, TOSL Engineering Limited offers expert sales support, guiding clients through the selection of the best systems for their requirements. Whether you're looking to harness solar power for your home or business, we provide sustainable and efficient solutions with unmatched reliability and customer service both locally and regionally. Our commitment to excellence ensures that our clients benefit from cutting-edge technology, expert advice, and seamless service every step of the way.

- Solar system designing and assessments
- Solar panel installation for residential, commercial, and industrial applications
- Solar farm development and management
- Solar-powered water heaters and lighting systems

PRODUCTS

- Photovoltaic (PV) Panels
- Inverters & Battery Storage
- Electric Vehicle (EV) Charging Stations
- Solar Street Lighting
- Building Management Systems
- Power Management (SIEMENS)
- Solar Charging Stations

SERVICES

- Procurement
- Installation
- Operations and Maintenance
- Take Out Maintenance
- Troubleshooting
- Integration
- Wind/Solar Hybrid Installation

RENEWABLE ENERGY

WIND POWER

- Wind system designing and assessing.
- Wind turbine installation and maintenance
- Micro-wind systems for remote areas
- Hybrid solar-wind solutions for enhanced efficiency

BATTERY ENERGY STORAGE SYSTEMS (BESS)

- Installation of BESS for backup power
- Pair with solar to store excess power
- Offer customised systems for commercial & industrial clients

GREEN HYDROGEN

- Electrolyzer systems for hydrogen production
- Hydrogen fuel cell technologies
- Hydrogen storage and distribution infrastructure

GEOHERMAL ENERGY

- Geothermal heat pumps for residential and commercial use
- District heating and cooling systems
- Geothermal resource exploration and consulting
