

WASTE MANAGEMENT

WASTE-TO-ENERGY

- Incineration technologies for municipal solid waste
- Biogas generation from organic waste
- Pyrolysis and gasification systems

WASTE-TO-BIOFUELS

- Biodiesel production from used cooking oil
- Bioethanol processing from agricultural residues
- Advanced biofuel technologies from algae and other feedstocks

WASTE RECYCLING / REFINING

- Waste lubricating oil recycling and refining
- Plastic-to-fuel conversion systems
- Metal and electronic waste recovery and repurposing
